

Keyless

SMART SAFETY & SECURITY SYSTEMS LLC

COMPANY PROFILE

KEYLESS products are the culmination of continuous R & D, testing and our ability to understand and solve customers' security related issues. Our continuing mission is to help people feel safer and more secure, without compromising the freedom in their daily lives. **KEYLESS** comprehensive range of products include:

- Padlocks
- Electromechanical Locks
- Door Cylinders
- Door Closing Solution
- CLIQ- Electronic Key Solution
- Ironmongery

ASSA ABLOY

**KEYLESS - TECHNOLOGY
PARTNERS**

ABLOY® High Security Padlocks operate reliably in the most severe environments such as coastal locations and freezing conditions as they do not contain parts such as springs or pins that can jam.

ABLOY® Padlock range is used extensively by Petroleum & Telecom Industry, Defence Forces, Heavy Industrial Operators, and High security Government Departments Worldwide.

ABLOY PADLOCKS

- **ABLOY®** the world's leading developer of products in electromechanical locking technology have been manufacturing electric locks for over 40 years, since 1970's. Product range covers multiple solutions in various standards.

- ANSI Range Solenoid Locks
- Europrofile Range
- Low Energy
- Scandinavian Range

ABLOY ELECTROMECHANICAL LOCK

ABLOY® locks are based on the unique operating principle of rotating detainer discs.

With no springs or pins to wear, jam or freeze, the mechanism provides a smooth and reliable functionality, excellent resistance against physical attack and maximum resistance to hostile and severe environments. The extensive product range includes cam and cabinet locks, switch locks, rim locks, drop bolts, and key deposit locks. The core always remains the same but the outer covering can be changed according to the need of local standards and applications in more than 80 countries worldwide.

ABLOY CYLINDERS

ABLOY® door closers protect door constructions by controlling the opening and closing actions of the door.

Reliable performance over a wide operational temperature range guarantees that energy will be saved and security increased.

Production of ABLOY door closers started in the 1930s. Today, we exploit the high quality and advanced technology in our purpose-built production facilities. Our long experience and extensive expertise combined with customer oriented research and development mean that we have a wide range of solutions for the varying demands of different door environments.

ABLOY DOOR CLOSING SOLUTION

ABLOY® PROTEC2 CLIQ - Secure, cost-effective and flexible access management system

The PROTEC2 CLIQ access control and locking system combines the best parts of electronic and mechanical world. Based on a rotating disc cylinder, the patented PROTEC2 ensures mechanical locking and electronic CLIQ technology enables the flexible management of keys, access rights and the access register. The double-secured system makes sure that the right people get to the right place at the right time – with one key only.

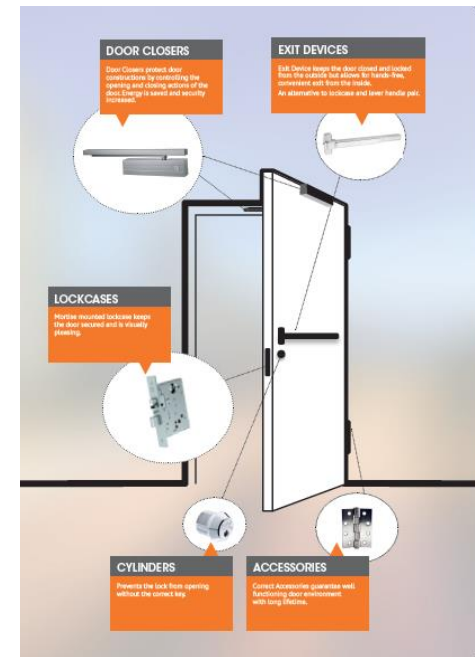

ABLOY CLIQ

ABLOY® has a wide range of Architectural Ironmongery as listed below:

- Handles
- Hinges
- Mechanical Lock Cases
- Door Hardware
- ANSI Locking Solution
- Industrial Locks
- Door Coordinators
- Panic/Exit Devices

ABLOY ARCHITECTURAL HARDWARE

- **IKON** is the original and has been shaping developments in lock and security technology for over 80 years. **IKON** Locking cylinders have been setting standards in many countries throughout the world. When the patent was granted, it gave rise to the age of what is known as the security cylinder. This is a legacy which we are committed to and which we are proud of.

- Mechanical locking systems
- Mechatronical locking system
- Electronic locking system eCLIQ
- Electronic locking system CLIQ Go

IKON locking cylinders offer high quality and security.

+CLIQ is the mechatronic solution for upgrading IKON mechanical locking systems.

Cloud-based CLIQ® Go

IKON PRODUCT RANGE

- Whatever you want to secure, protect, maintain we have the technology you require. the company **effeff** based in Albstadt became the market leader in the field of door control systems by following a consistent strategy. Our customers benefit from the extensive know-how of the largest international group of companies, meeting every requirement in terms of total security and comfort throughout the world.
- Electric strike
- Electric bolts
- Security locks
- Access Control Systems
